

Professional Summary

Results-driven Freelance Full-Stack Developer with 2+ years of professional experience building scalable web applications for enterprise clients. With a proven track record of delivering live client projects - including a product catalog website for an industrial manufacturer. I help businesses establish their digital presence with clean code, optimized performance, and on-time delivery.

Freelance Projects

Conveyor Industries - Business Website | HTML, CSS, Javascript

<https://conveyorindustries.in/>

- Designed and developed a complete multi-page product catalog website for a leading industrial conveyor manufacturer serving sectors like Sugar Mills, Cement Plants, Dairy and Food Industry.
- Built a rich product gallery showcasing 30+ products across categories (Conveyor Chains, Roller Conveyors, Industrial Chains, Attachments, etc.) with image-based navigation.
- Implemented responsive layouts ensuring accessibility across desktop and mobile devices.
- Integrated industry-specific service pages for Chemical, Pharmaceutical, Fertilizer, Sugar, Rolling Mills, and other industries.
- Delivered a fully functional, live production website with fast load times and clean, maintainable code.

Patel & Shah e-Commerce Consultancy | React Js

<https://patelnshahecom.com/>

- Built a modern single-page application (SPA) for an e-commerce consultancy firm using React.js with dynamic routing and reusable component architecture.
- Implemented client-facing features including service offerings, consultancy information, and contact sections tailored to the business's branding.
- Optimized the React application for fast load times and smooth user experience with efficient component rendering.
- Deployed and maintained the live production application ensuring seamless accessibility.

Portfolio Website | React Js, Vercel

<https://meghshah-portfolio.vercel.app>

- Built a personal portfolio with reusable components and dynamic routing to showcase projects and skills.
- Optimized deployment using Vercel CI/CD, ensuring fast load times and seamless accessibility.

Training Record System | .NET Web API, Angular, SQL Server

- Developed a role-based system with authentication & authorization, improving operational efficiency.
- Applied reporting and training management modules, improving data tracking efficiency by 30%.
- Achieved high code quality with unit testing (xUnit, Jasmine/Karma) and modular architecture.

Technical Skills

- Programming : Javascript, Typescript, C#, SQL
- Frontend : React.js, Angular, HTML5, CSS3, Tailwind CSS
- Backend : .NET Core 6, Web API, Entity Framework, Node.js
- Database : SQL Server, MongoDB
- Cloud: Docker, Azure Devops (CI/CD), AWS
- Unit Testing : XUnit, Jasmine, Karma, Postman
- Tools and Systems : Git, Github, Azure Devops, Jira

Education

Birla Vishvakarma Mahavidyalaya , V. V. Nagar
B.Tech in Computer Engineering

2020 - 2024
CPI: 8.42

Professional Experience

MRI Software
Software Engineer I

Sept 2025 - Present
Vadodara - Gujarat

- Designed and implemented core modules for a real estate platform, enhancing overall user experience by ~25%.
- Enhanced backend processes and database queries to improve performance and scalability, reducing average response time by 30%.
- Actively contributed to in Agile Scrum ceremonies and cross-functional teams to align priorities, improving sprint delivery efficiency by 20%.
- Developed and executed unit tests to strengthen system reliability and reduce production defects by 15%.
- Analyzed and resolved critical production issues, improving system stability and reducing recurring defects by 20%.

Alois Solution Pvt. Ltd.
Associate Software Engineer

Nov 2024 - Sept 2025
Vadodara - Gujarat

- Developed scalable full-stack applications, improving page load time by 20% and overall app performance by 35%.
- Executed WebSockets-based real-time data synchronization, reducing data latency by 40% and enhancing live user interactions.
- Collaborated with international clients to gather requirements and deliver high-quality features, ensuring 95% on-time delivery.
- Managed CI/CD pipelines using GitHub Actions and Jenkins.
- Applied performance optimization techniques (caching, lazy loading, code splitting) to improve frontend efficiency and responsiveness.

Civica Resource Pvt. Ltd.
Junior Software Engineer

Feb 2024 - Nov 2024
Vadodara - Gujarat

- Contributed to the development of enterprise-level web applications, supporting internal business operations.
- Gained hands-on experience in Scrum practices, actively participating in sprint planning, daily stand-ups, and retrospectives to improve delivery efficiency.
- Collaborated with cross-functional teams, strengthening team coordination and improving feature delivery timelines
- Built strong understanding of professional software development practices, including code reviews, version control, and structured debugging, improving code quality and maintainability.

Why work with me

- Live projects delivered: real clients, real deadlines, real results (conveyorindustries.in, patelnshahecom.com)
 - Full-stack capability from API design to pixel-perfect frontend - one person, end-to-end ownership
 - Professional engineering background ensures enterprise-grade code quality, testing, and maintainability
 - Clear communication, on-time delivery, and transparent progress updates throughout every project
-
